STATE OF ARKANSAS  
1840 UNITED STATES CENSUS

We are very grateful to Dr. John L. Ferguson, Executive Secretary of the Arkansas History Commission, to whom this book is dedicated, for permission to use the index cards compiled for the various counties of Arkansas for the 1840 census, the first Federal Census taken after Arkansas was admitted to the Union on 15 June 1836. These cards were loaned to us in order that they might be indexed for the entire State and this information published for the use of historians and genealogists interested in the history of Arkansas. These hand-written index cards were transcribed from microfilmed original records of the United States Bureau of Census, National Archives, Washington, D. C. Though every effort to produce an accurate copy has been made, errors may be found because of the difficulty in reading parts that were almost illegible and to possible errors in our transcription.

This book is what its name implies -an index- it does not undertake to give the full census return for each family. Only the name of the head of the household & county of residence is shown. This particular census enumeration contains the following information and the microfilm should be consulted for the full return once the county of residence is determined.

1. Name of city, county, township, etc.
2. Names of heads of families.
3. Free white persons under 5 years of age, five and under 10, 10 and under 15, etc., to 100 years.
4. Free white females, same as above.
5. Free colored persons, males, by age group.
6. Free colored females, same as above.
7. Number of persons in each family employed in mining, commerce, manufacturing, and trades, etc.
8. Pensioners for Revolutionary War or military services included in the foregoing with names and ages.
9. Deaf and dumb and insane white persons included in the foregoing detail.
10. Deaf and dumb and insane colored persons included in the foregoing.
11. Schools, etc.
12. Number of white persons over 20 years of age in each family who cannot read or write.
